Email Backup Service

Dropmyemail Business is the solution to all your email archiving, compliance, discovery and functionality needs. With our cloud-based email back up, you will cut costs, satisfy regulators, safe guard company's interests and have constant access to your emails.

Why back up your corporate email?

Email as the primary communication tool for businesses is significantly rising in volume

Reduce rising email storage and management costs

More and more governmental rules and regulations for email transparency and data accountability

Satisfy rigid e-discovery and compliance needs

Accidental or intentional deletions by the staff of important email chains and attachments.

Protect your business and employees

Backups are only for disaster recovery, while archives are for retention and discovery. Cloud-based email backups are for even more than those two combined.

Primary Purpose	BACKUP	ARCHIVING	CLOUD BASED EMAIL BACKUP

What Dropmyemail Business Offers:

Automated Incremental Email Backup

Dropmyemail ensures that backing up your emails is simple and easy. You can backup your emails using IMAP or POP protocol. Backups take place automatically on a daily basis and incrementally thereby saving you space.

Mass Migrate and Restore emails with One Click

Just authenticate your new mail server, with a single click, all your emails accounts and their respective emails (inbox, folders and sent items) will be migrated over.

Secure Storage

We pay special attention to ensure that no one other than you have access to your backup emails and mail server. All emails are pulled from your mail server using TLS or SSL when available and encrypted using 256 AES encryption cipher.

Compliance With Email and Document Retention Requirements

With the increasing need for transparency, security and accountability in email, our email backup service is in line with industry best practices as well as retention and compliance regulations.

Detailed Reporting and Audits

Dropmyemail provides you with detailed reporting and audits on your email usage. You can generate custom reports to know your day-to-day email usage and keep a tab on the emails sent and received by every email account.

Unlimited storage

We provide unlimited storage for every email inbox. Do not worry about deleting emails to reduce storage costs. Dropmyemail ensures all your emails are backed up securely using enterprise standard hardware and software technologies

Easy Mail Management and Search

Use the easy interface to add email account/s to be backed up. You can view all emails backed up in the cloud. Search through emails and attachments using our mail search. View previews of attachments or download them when needed.

Comparing Dropmyemail's Service with McAfee's Email Archiving

McAfee

Does not support reporting & Auditing

Mainly built to support Exchange Server

Does not include a restore or migrate feature

No single click download feature.

Dropmyemail

Enhanced reporting & Auditing

Supports IMAP & POP3

Single click Restore & Migrate Feature

One click Download feature for the Emails in eml format
